

Choosing new equipment is only the first step in customizing a comfort system for your home.

Honeywell offers a wide selection of comfort enhancements for designing a system that meets the needs of your family.

Installing a new heating and/or air conditioning system is the best time to consider accessories that can help:

- Improve your family's comfort
- Increase energy savings
- Maximize the operating efficiency of your new system
- Protect your home and its contents

Honeywell - an industry leader in comfortable living.

Enhance your family's comfort with Honeywell...

Thermostats

control...

- Use a Honeywell electronic thermostat on all equipment installations
 - More accurate temperature control
 - Easy to use and program
 - Proven Honeywell quality and reliability
- Select a thermostat model based on your family lifestyle

T8600 Deluxe Chronotherm® Thermostat

- Honeywell's residential thermostat with the most features
- Can save up to 33% on heating and cooling bills by automatically adjusting the temperature to save energy while you are sleeping or away from home*
- Maintains temperature within 1° of set point
- Large, backlit display
- Includes "adaptive intelligent recovery" to automatically adjust system operation to meet comfort needs while minimizing energy usage
- Up to 4 temperature changes per day with separate programs for every day – easy to temporarily override the program with up and down temperature arrow buttons

T8000 Standard Programmable Thermostat

- Can save up to 33% on heating and cooling bills by automatically adjusting the temperature to save energy while you are sleeping or away from home*
- Allows up to 4 temperature changes per day and a different program for weekend days
- Easy to program; large readable display

T87 The Round® Non-programmable Thermostat

- Long-lasting, reliable performance
- Simple operation with separate temperature setting and thermometer scale on the face

*depending on your geographic area; if used as directed

High Efficiency Filters

trap...

- All systems with air conditioning, and all high efficiency furnaces, should have a Honeywell high efficiency filter installed. This helps protect your investment in system efficiency by keeping the indoor coil clear of dust and lint
- Select the model that provides the air cleaning power that your family requires

F50 Electronic Air Cleaner

- #1 Preferred Honeywell electronic air cleaner for over 40 years.
 - Helps protect the operating efficiency of heating and cooling equipment – backed with a 10-Year Clean Coil Guarantee
- Can help remove mold spores, bacteria, cat dander, ragweed pollen and more from the air passing through it
- Permanent metal cells are easily washed by the homeowner every 6 to 12 months – good for your budget and good for the environment

F100 Media Air Cleaner

- Reduces impurities and particulates re-circulated through the air
- Easy filter replacement
- Includes exclusive AIRWATCH™ filter reminder

Whole-House Humidifiers

moisturize...

- A Honeywell whole-house humidifier helps save energy, improve comfort and protect your home and woodwork from dry indoor air
- Select the model that fits your system design and satisfies your need for accurate humidity control

Both Models:

- Exclusive PerfectFlow™ water distribution tray optimizes efficiency and water usage
- Continuous flushing reduces maintenance when hard water is present
- Easy to use control can be mounted in any convenient location

HE360 Powered Bypass Flow-through Humidifier

- Good choice if you have wood floors and furniture
- Evaporates up to 18 gallons of water per day into the home

HE260 Bypass Flow-through Humidifier

- The most popular type of Honeywell humidifier
- Evaporates up to 17 gallons of water per day into the home

Ultraviolet Air Treatment Systems

zap...

- Ultraviolet (UV) Air Treatment Systems for families concerned about airborne mold and germs.
- Select a system that provides the level of protection your family desires

Both models:

- Kill or neutralize microorganisms by using ultraviolet light to cause cellular and/or genetic damage to the organisms
- Require only periodic maintenance to replace UV lamps
- Include exclusive safety design features

UV100A1059 CoilPlus™ UV Air Filtration System

- Mounted adjacent to the indoor cooling coil; bathes UV light over the coil to reduce mold growth

UV100A1018 Dual Lamp Return UV Air Filtration System

- Mounted in the return air ductwork of your heating and cooling system; kills a high percentage of certain bacteria in the air that is circulating from the home to be reheated or re-cooled

Choose enhanced comfort and feel *right* at home...

PC8900 Honeywell Comfort Center™

manage...

Make adjustments to your indoor comfort system from one, easy-to-use control – for temperature, humidity, ventilation and the system fan.

- Temperature, fan, humidity, ventilation – no need for separate controls on the wall
- Filter maintenance indicator reminds you to wash or replace equipment filter
- Service indicator light lets you know if there is a system concern
- Optional outdoor temperature sensor

One control that simply brings it all together...

C8600 Carbon Monoxide Monitor

monitor...

All homes with combustion equipment should have a Carbon Monoxide (CO) Monitor to help protect family members from the possibility of carbon monoxide poisoning.

- The only biotechnology-based infrared-gas sensor that mimics the human response to CO, making it one of the most reliable monitors available
- Detects low levels of CO (70 parts per million)
- Triggers a loud 85-decibel horn and pulsating LED to warn of the presence of CO
- Every unit is 100% gas-tested to ensure an accurate, timely response
